Subject: RE: Sample Information Form

George,

I do not know if GCHD will be sampling the schools. There are GCHD logistic and resource issues that need to be worked out. At this point, I recommend that MDEQ consider other options to obtain the water samples.

Thanks Jim

Subject: Sample Information Form
Importance: High

Good morning everyone,

In an effort to simplify the sampling procedure we have modified our standard sample information form so that it is customized to the school sampling that we are doing. Our standard form does not have the newly created 32CC analysis code.

Please review the attached spread sheet and comment as you see fit. We will need to finalize this either today or tomorrow so that Jim's group is ready to roll after the plumbing evaluations are done.

In order to expedite the process this will be a single part form, samplers will need to make copies of the forms if they want one.

We can also modify the form further after the first three schools depending what we learn from that experience.

Thank you!
George
