Subject: RE: TAC Save The Date

I have a call in to Kaplan to have a 1 on 1 discussion about several issues including this.

Subject: FW: TAC Save The Date

FYI. I'm not sure what is meant by recommended next steps as those are still yet to be determined, and why EPA would be giving an update on Flint's status. Can we check with Bob Kaplan on this to verify what is on their agenda?

SAVE THE DATE

Wednesday, December 9, at 12:00 noon
 Location to be determined.

Although we do not have a scheduled meeting of the TECHNICAL ADVISORY COMMITTEE, the experts from the EPA are still going to be in town on December 9. They have offered to give a presentation to all who are interested about water treatment/corrosion, and to discuss the status of Flint's water and recommended next steps. There will be time questions and answers as well.

More to come.
