Subject: RE: Governor's Report

Instructions for lead and copper sampling were finalized based on comments received from EPA. Final draft was shared with the City of Flint personnel on Friday, 12/11/15 for use in their next round of lead and copper compliance monitoring. WORD and pdf versions were posted on the DEQ website on 12/14/15 and replaced previous version of the instructions.

DEQ comments provided to DHHS on the phosphate fact sheet were addressed. DHHS shared a final draft of the fact sheet.

DEQ and EPA had a conference call on 12/9/15 to discuss draft document prepared by EPA entitled "Optimization and Maintenance of Optimal Corrosion Control Treatment". On Friday, 12/11/15, DEQ met with the City of Flint, their consultants and EPA participated by teleconference in further discussion of what is required for a corrosion control study prior to the switchover to the KWA.

George -- not sure whether you want to mention this or not (depends on whether the Governor's office was aware of the issue)

On Tuesday, 12/8/15, DTMB confirmed that the e-mail sent from Liane Shekter Smith on August 25, 2015 to Ms. LeAnne Walters was successfully delivered to the gmail.com system at the e-mail address provided by Ms. Walters.
