Subject: Flint Home owner lead results
Importance: High

If you come across any lead result that is 100 ppb or greater, please send me an e-mail with the contact information. Since the client is always listed as Mike Glasgow, City of Flint, please provide the sampling address so that a google search can be done to find out who the appropriate contact would be. If the paperwork has that information then please provide it.

Please make sure that this information is provided once the data has been validated. There is no need to wait until the final report has been issued. This only applies to Flint homeowner samples and not the school testing samples. The School samples are going through a different process that does not require follow up contact by DHHS.

Please make sure that you include Linda Dykema on the e-mail as DHHS will be making the contact.

Thank you!
George
