Congratulations George! I wish you well with this endeavor. It will be in good hands, as will be your lab.
 Beth

Subject: Laboratory Director

As you are all aware, the City of Flint as well as the DEQ have been in the news lately with respect to drinking water and lead concerns. Director Wyant and the DEQ are taking a number of steps to resolve those concerns, including analyzing drinking water samples from the schools and residences. Director Wyant has temporarily assigned George Krisztian to the Executive Division to provide assistance in working with the many partners and stakeholders to address these issues. George's experiences, knowledge and skill set will be a great asset to the DEQ team in this endeavor.

The time frame for this temporary assignment is uncertain at this point, however Carol Smith and Kirby Shane will alternate as Acting Director at the Laboratory in the interim. Please note that the Laboratory staff will be processing a very large number of drinking water samples during this period. We may also need to provide support in other ways (administrative, data entry, etc.) to our co-workers at the Laboratory as well.

Your support, understanding and patience are greatly appreciated as you interact with the RRD Laboratory staff. Our Laboratory provides outstanding customer service, excellent turn around times, and high quality results that will be used to evaluate the situation and make critical decisions. We are proud that we are a part of the team!

Thank you - please contact me if you have any questions, or feel free to work directly with Carol and Kirby.

Sue Leeming, Assistant Division Chief
 Remediation and Redevelopment Division
