Thanks for checking! The coding down below is NOT the same thing. The coding below was simply for the preliminary investigation of the first 13 schools.

What we are talking about now is the full blown sampling protocol for these same 13 schools and the funding for that was the million dollars that was appropriated for Flint lead and copper testing. Please set up a separate account using the coding information provided by Anastasia.

Thank you
George

George,

Before I send the number out, below is the email that I was referring to from last week. Is the testing that Julia and Sylvia discuss below something different than the testing you need an account number for?

Thank you,

Kathy Willoughby

Julia,

The account number for these tests is M99953598.

Thank you,
