You may want to consider the idea of providing an edited copy of the report that removes the intake location and specs. I have done this before when there is a request for a community's assessment. Are there any concerns there?

Mike,

You may want to inquire why they don't have a copy of this record as it is a requirement. In addition, per the required CCR language they are supposed to make it available to their customers upon request.

We should also have a copy of this somewhere in the basic data files.

Jason,

Has a source water assessment been performed for the Flint River watershed...spec. for the Flint WTP intake? If so, the city of Flint would like to obtain a copy of source water assessment report.
