Subject: Clarification - Optimal Corrosion Control Treatment for Large Drinking Water Systems
Attachments: image2015-11-03-155158.pdf

Good Morning State Administrators -

Attached is a memo from OGWDW Director Peter Grevatt to his Division Directors that provides important clarifications regarding the application of the optimal corrosion control requirements of the lead and copper rule. More specifically, the memo speaks to those situations where a large water system ceases to purchase treated water and switches to a new drinking water source.

If you have any questions or concerns related to this memo, please contact Maria Lopez-Carbo, Chief of the Protection Branch in the Office of Ground Water and Drinking Water at Lopez.carbo@epa.gov <<mailto:Lopez.carbo@epa.gov>>.

As always, you are also welcome to contact ASDWA staff - either Jim Taft (jtaft@asdwa.org) or Darrell Osterhoudt (dosterhoudt@asdwa.org) would be happy to discuss any issues you may have.

Thanks!

Bridget
