Understanding
 Your Drinking W...

I made some changes, see attached. Personal opinion, we are limited as to how many parameters can fit in the Unit 32, "R" analysis. My recommendation is to keep it as it is and get this Fact Sheet updated and posted on the web page. What is the next step?

Attached is a very rough draft of the brochure, "understanding your drinking water results" with comments from community health and me. I will bring copies to the meeting.

I didn't reflect back to see if Lois's concerns were all addressed, but I don't believe so.

As this brochure is used for after the sample was collected, I removed the info about sample collection to keep to one sheet of paper.

I did not keep most "track changes" on, except in the areas that I have real concern. I am happy to provide them if you are interested.
