Subject: Follow up on Phelps FOIA request

Hi Brad, hope you're better than Sunday night.

I'm wondering if you can help me sort something out.

So, there's some people who are familiar with EPA regs telling me that the state was required to approve the Flint River switch. They point to section 141.90 (a)(3), which, in summary, says (on page 2 of this document):

"At a time specified by the State, or if no specific time is designated by the State, then as early as possible prior to the addition of a new source or any long-term change in water treatment, a water system deemed to have optimized corrosion control... shall submit written documentation to the State describing the change or addition. The State must review and approve the addition of a new source or long-term change in treatment before it is implemented by the water system."

And so I'm wondering can you show me where the state did this? If I have to FOIA, fine, but I'm not even sure what specifically I would put in the FOIA request. I'm trying to avoid the "these documents do not exist" response that Rep. Phelps got, know what I mean? I have his FOIA request and I'm pretty sure he was looking for the same thing, so I don't want to duplicate.

So I guess, my last question is, if these documents don't in fact exist, is it fair to assume that's because either the city never submitted written documentation to the state describing the change or addition or the state didn't review and approve the new source? It sounded from some MLive reports from back then that something like this was going on, I'm just not sure if it ever ended up happening, and if so, where's the documentation. Help?

All the best,

--

Bob,

Forwarding Flint Corrosion Control proposal info per Jim's request (see the 3 attached emails).

We had a conference call with Darren Lytle and Mike Schock this morning to get some things clarified and will be summarizing that conversation. I will include you and Jim when that gets sent out. Let us know if you need anything else.
