Subject: Questions About City Of Flint Water

Mr. Sygo

My name is LeeAnne Walters and I have a few questions about our water.

The first question what is the status of the pumps that are supposed to be installed for the ortho phosphates?

The second question is once the switch to the KWA happens, what will be the emergency water source for the City of Flint? Will it be Detroit or Flint River

Third question is a few months back Howard Croft confirmed a Y was installed at the water treatment plant to blend the untreated lake water with the Flint river water if needed. Will this still be happening/and or an option to happen.

I dont know if you are aware and I can provide pictures if you would like of the brown water that is coming out of people's taps because of the hydrant flushing. The city has been contacted multiple times and no answers have been given. Why are the people not being made aware of the flushing and contacted before it happens. Why is there no notification from the city or the MDEQ.

Respectfully
LeeAnne Walters

Subject: EPA Flint Task Force -- Draft Preliminary Assesment for discussion

Jim,

As we discussed on the call yesterday, I've attached the draft Task Force Recommendations for optimization of corrosion control, both for current water supply and for the switch to KWA water). We wanted to share this draft with MDEQ first and get feedback prior to our meeting on December 11. Note that several sections are omitted pending further discussion, including specific funding estimates and outreach to Flint.

Thanks,

Bob
