I didn't realize I was still the one editing -- Liane asked for my original draft today to work on. I can keep going on it if you want.

Amy,

I added some information on operator training and source water protection on the second page. If you think it is getting too long, feel free to not use it.

I also corrected the spelling of Genesee County on the first page in case no one else does.

Did we ask Chuck to add something from the Contamination Investigation program if it is warranted? He would also be the right one to add something about the work that has begun with RRD to address overlapping issues.

Richard
