I forgot you wanted to make some changes, I will just re-send later today to the group and say "with Liane's changes/comments"...nobody is around today anyway.

Thanks,

Tracy Jo

I have some suggested changes. I used track changes, there is a comment on the last page regarding the use of "not detected" where earlier in the document we say "non detect"...I think we should pick a way and be consistent. After these small changes, and George's approval on content, I think we can forward to Lisa in OEA to put in report format.
