 Subject: Pb protocol: Signed Milwaukee CARE QAPP

See page 9. This was the approved lead sampling protocol for the Milwaukee Care project for lead sampling at homes that were operating as daycares. Janet said that Francine St. Denis was very interested in using this sampling protocol for the Kellogg lead sampling project at CWS schools—it requires 8 samples—sequential sampling.

I have a call into Miguel to see if this sequential sampling would work for CWS schools, or what modifications could/should be made to the protocol.

You may want to ask Miguel or Francine if the this was used for Kellogg too.
