Attached is a first attempt. Probably needs some help on content/balance/tone, but at least it gives us something to start with. I'll bring copies tomorrow. -Amy

Subject: FOS 2014 Update

Amy,

I'm sure you have seen the ODWMA 2014 Updates Liane has distributed to the office staff. The last one she has to complete is on the Field Operations Section. She told me that the SRF Section had several staff collaborate in preparing their Update, and she thought that the same approach could be used for the FOS portion. I said I was willing to do it, but I wasn't sure I could keep it as short as the first two updates! I also mentioned that perhaps it would be better to obtain a district office perspective. I mentioned you as a possible candidate, and she agreed and suggested I call you. Of course, I forgot to contact you today. But an email will give you time to contemplate your response.

I have attached a copy of the 2014 Annual CD report that provides a description of many of the activities we conduct to prevent water systems from failing and some examples of those activities in the past year. I thought it could be used to outline major areas of activity and then include some illustrations. I think I would mention Flint, the transition of DWSD to GLWA, maybe our realignment with noncommunity and contamination investigation staff, etc. But already I sense it getting too long. If you want to do it, or collaborate with others (me, etc.), let me know.

Richard
