I just got back from Flint and have another meeting to attend. I can come in Sunday morning and work up a response and submit to you both for comment. Please let me know if that is an acceptable time frame.

Dear Mr. Wyant,

Thank you again, for sitting down with us for an interview regarding the water crisis in Flint.

I have a couple of quick questions to clarify if you can please help answer these today:

1 – What is the current method that the state is using to test the water in Flint?

How, specifically, is it different (or the same as) the testing that occurred prior to the public recognition of a lead risk in the water?

Does pre-flushing occur now?

Is the state using wide-mouthed bottles or narrow bottles?

Is the water sampled at a slow rate as it is coming from the faucet?

2 –When you admitted a mistake in the “proper protocol,” in October, were you referencing more than one specific protocol, or just the lack of corrosion control?

Thank you!

Sincerely,
Lori Jane Gliha
