Hello Steve and Mike. The City is planning on repairing a break on a 16" line on Saturday. The shutdown area will also allow us to replace a 24" valve, 18" valve and two 12" valves. We are planning to issue a Boil Notice for the affected areas. Could you please get back with me so we can coordinate what we've got going with your office. You can call me at (810) 577-8906 to set up a conference call.

Thanks

In the unlikely event that any residents in the area should experience a loss of water or low pressure during the repairs Saturday, they should expect to boil water for 48 hours after service is restored based on testing. Low pressure and discoloration may occur for those affected. The City of Flint asks that residents watch their local news station for announcement of the completion of repairs.

The work being performed will result in improved operational control over our large transmission line down Dort Hwy. which will include improving chlorine residuals in the southern portion of Flint. All of the scheduled work taking place is part of an ongoing, broader plan to examine different sections of the water system citywide for needed repairs and upgrades. Upgrading critical infrastructure such as the water system is a key part of the City's Strategic Plan.
