Attachments: RE: Premise plumbing; Premise plumbing

Attached is some additional information regarding what plumbing appurtenances, fixtures, appliances, etc. would pose potential risk for harboring legionella.

Here are the two separate emails that Steve sent to the hospitals in Flint that Mike and he visited recently to discuss premise plumbing issues.

Each of the emails has the 3 attachments that were mentioned in the managers meeting today.

The email messages outline an approach we should all follow for now when dealing with these facilities on this issue.

Attachments: Final Genesee supplemental questionnaire 2-23-15.docx

Glen,

The attached questionnaire that would be utilized by the Local Health Department and Department of Health and Human Services provides additional detail of what to be on the lookout for (See Questions 12 and 13). As we indicated almost every service connection could potentially have some element associated with what is listed in this questionnaire, but we are just looking for a rough list of those with more non-typical appurtenances such as spas, grocery stores with spray/mist system, garden/nurseries with mist irrigation, etc., and those that Mike provided. Thanks.

Subject: Premise plumbing

Glen,

Based upon our discussion during our April 29th, 2015 site visit, approximately 40-45 commercial/industrial customers were identified as a potential candidate for needing a premise plumbing Water Safety Plan (WSP). Attached is a list of mechanical components within building premise plumbing to assist you in confirming this and/or identifying additional customers that could serve as WSP candidates. Please send us your completed list at your earliest convenience. Thanks.
