Subject: Re: Hurley Hospital's bulletin regarding Flint water

Have we seen the Genesee HD talking points?

Do they have a public health strategy? Is it consistent with what I wanted yesterday: increased testing and strategies to reduce exposure whether or not it's a result of the hook ups that are the responsibility of the property owner?

Mikelle has been told the Genesee Health Department will also be at the press conference today in Flint with the below groups. They have put together a fact sheet on lead and water that they will be sending us this afternoon.

Angela and I have just gotten off the phone with Nancy Peeler and Bob Scott and are putting together talking points about this "study" that the physicians will be discussing that claims an increase in EBL in children since the change to the water system source.

DEQ will be answering the questions as to why the city cannot just switch back to the Detroit system and how that won't solve the problem. We will answer the health questions.

The City of Flint is also issuing a water advisory today to educate residents and has also asked the Governor for \$30 million. http://www.mlive.com/news/flint/index.ssf/2015/09/flint_will_issue_lead_advisory.html#incart=1m-rpt-2

Subject: Hurley Hospital's bulletin regarding Flint water

Team,

Here's the media bulletin issued by Hurley Hospital in Flint about the lead blood levels press conference this afternoon. I've reached out to Hurley's communications team, which has promised to send me whatever it has shared with the media on an embargoed basis. I'll forward that as soon as I receive it.

Dave
