Can you send us a public version? As soon as we put out the attached tomorrow we're going to get asked for a breakdown of the numbers in the report by zip code. When that question comes up, what can I share with the media?

All, the tables aren't copying well into word, so the excel work book is attached.
 Please let me know if you have any further questions.
 Patti

We should get both the one for internal use only with all the numbers and the public version as well.

Subject: RE: Updated Summary

Very nice summary. The heading for *WIC Children* needs to be bumped to the next line and I agree with Eden that we should put water issues to the top of the list under *Reducing and Removing Lead Exposure*. Could we also revise the 3rd sentence in that bullet to read:

"The lead in household water usually comes from the service line that connects your house to the water main or the plumbing in your house, not from the local water supply."

Lead service lines are the biggest lead contributor and are owned in part by the water supply, so it's incorrect to lay all the blame on household plumbing.
