Subject: RE: briefing for Nick
Attachments: 23Oct15 Executive Summary for Blood Lead Modeling Results.pdf

Dr. Eden Wells and Dr. Linda Dykema met in Flint with Mayor Dayne Walling and Howard Croft (Public Works Director), and DEQ staff including Jim Sygo, Karen Tommasulo, and George Krisztian. The purpose of the meeting was to provide city of Flint officials with a general update of DEQ and HHS efforts to date with special emphasis on plans to conduct water testing in city of Flint schools. DEQ and HHS staff were given a tour of the water treatment plant following the meeting.

Division of Environmental Health toxicologists developed a one-page summary (attached) describing the results of using the US Environmental Protection Agency IEUBK model to predict the percentage of children whose blood level could exceed 5 µg/dL under various scenarios. The summary is intended as an aid to assist in selecting an appropriate health-based screening level to evaluate the results from water testing in city of Flint schools.

What time do you plan to compile briefing items each day? I'm heading to Flint this morning for the weekly meeting re testing of water in Flint schools, which will include a tour of the water treatment facility. Please let me know what time you need an update. Thanks
