Hi Dr. Eden,

The health plans are required to get prior approval from MDHHS when participating in health fairs. Health fairs are seen as a form of marketing, so we just need to review and approve all participation to make sure their marketing meets contract requirements. It's a simple process and I'm actually the one who provides final approval and will know to move ahead quickly when these requests come through.

Hi Dr. Eggleston,

Just closing a loop:

Molina HP is working with GCHD to set up two Flint school lead testing fairs in January. However, they are still telling GCHD (Toni, CC'd) that they have to submit a request to Medicaid to do so. Just thought I would close a loop if there is one with this email.

Eden
