Subject: RE: Updated Summary

Very nice summary. The headline for WSC CHM does need to be bumped to the next line and I agree with Eden that we should put water issues to the top of the list under *Reducing and Removing Lead Exposure*. Could we also revise the 3rd sentence in that bullet to read

"The lead in household water usually comes from the service line that connects your house to the water main or the plumbing in your house, not from the local water supply."

Lead service lines are the biggest lead contributor and are owned in part by the water supply, so it's incorrect to lay all the blame on household plumbing.
