

And I spoke too soon! Daisy is the person that was mentioned previously so I guess all necessary individuals are already involved. ☺

This was discussed internally with Sue Moran and others and we have other staff within Medicaid (those that work more directly with data warehouse) that would work on this data request. Let me touch base internally and let you know who should be involved -- Monica or I may still be involved, but we would need our data staff at the table to hear what they need to pull.

Subject: RE: Molina Lead Health Fairs- January 2016-? request to Medicaid?

Heads up:

Good afternoon Heather, Daisy and Monica,

Last week Dr. Wells, Sue Moran and I met with Medicaid health plan staff to discuss enhanced blood lead testing of children < 6 years residing in Flint. We have developed a set of metrics to monitor MDHHS activities in Flint and wanted to develop a metric/s for the percentage of children (and infants) residing in Flint and enrolled in Medicaid who have received blood lead testing.

Knowing some of the challenges of working with Medicaid data, one of our requests to Medicaid was for help in developing a method to define "children enrolled in Medicaid" in Flint. We wanted to use that number as a denominator in some new metrics to measure the degree to which messaging and activities related to blood lead testing among children in Flint are having an effect. Daisy and Monica – your names came up as individuals we could work with.

I would like to schedule a workgroup to discuss development of a denominator based on Medicaid data and to provide a brief background on the Flint water situation. From the population health administration, our workgroup members would be Patti McKane, Martha Stanbury, myself and Eden Wells as the department's CME.

Monica – I was told you may want to appointment someone in your place. If that is the case please let me know. Otherwise I anticipate the Medicaid program members of this workgroup would be Heather, Monica, and Daisy.

Thank you for your help.

Corinne
