Subject: RE: Preliminary & Deliberative Not Subject to FOIA : Infographic for Flint

Hello all:

Attached is an updated version of the graphic. I needed to recreate it because apparently the VPN doesn't work unless you request the software to be installed, too. Who knew that was a separate process. Anyway, take a look and let me know what you think.

Genesee Co has also asked that we use the logo that I included on this version for all outreach items. I have to update the other FAQ flyer and then will resubmit it to them and to you all for updating on the website, please. That will come tomorrow...

Also, any thought on if you want me to use the Action Flint template for any additional fact sheets? If so, let me know and I can update the FAQs at the same time I'm updating the county logo. I'd need the template, however, please.

Thanks!

Yes, that is fine. Please make sure they understand that this is not the final version, and they should not be distributing it until they receive the final. Thank you!

Hi Amy:

You're not being picky...The feedback is good...That's because they were cut & paste... :) I was working from

home last night and had to work with what I had...I will set up my VPN tonight and get the original file and fix it...

In the meantime, while we're traveling & I don't have access to my computer, can I forward the draft to our contacts at Genesee local health for any comments from them, so I can update everything at once? Do you mind?

Sorry if it seems like we are being picky, but the people in the attached file look like they have a fuzzy border around them. It's almost like the images were and cut and pasted from something.

Hello all:

Per Kory's directive, I'm attaching the updated infographic with more visible people. I also am attaching a version with no background color...

For what it's worth, I never really intended on this being printed on a personal printer. I meant for it to be used as a social media tool, website doc, and/or professionally printed and distributed as a poster to partners and doctors' offices, etc...

However, if we think that people will print it out themselves, the version with no background color at all will probably be better to distribute so that people who print it can save their ink...

Please let me know if you want me to make additional changes. ☺

Thanks!
