Eden and Sue,

Attached the email indicating that the paperwork for the data request has been approved. Our CLPPP is working on getting the raw data to Hurley.

Also attached is a summary of the call we had with our BFMCH team here this morning. The items that are in bold are ones we are working on and will have an update for you this afternoon. Please do not share this status update with others as we are using it for communication with our internal team. I've asked our team to do the same.

Please let me know if you have any questions.

Thanks,
 Rashmi

Just saw this after my last email to you about the DUA and IRB status. Responding to you, assuming you will forward to Sue/Eden.

Yes, we can provide the raw data. See previous email for status of DUA and IRB as we currently understand it.

Subject: FW: Request for data

They do not want cleaned data. Bob or Nancy, please advise as to status of their request.

Subject: RE: Request for data

We specifically want the following fields for all kids under 5 years of age in Genesee County from Jan 1, 2013 to current.

Some pt identifier/number

Street address

City

Zip

DOB

Date of blood lead

Lead level

(race and gender if available)

If I can get all that, we can run focused GIS analysis in less than a day. We already have the macros/runs set up to clean the data and geocode them. We are completely transparent and will share all.

We'll take anything. Does it have street addresses for GIS mapping and unique identifiers to eliminate duplicates.

I would prefer raw so we can clean on our own.
