At one point, we mentioned doing a lead fair at the farmer's market, but Toni followed up and the farmer's market folks were not interested I think secondary to some recent water-related protests, fights, etc (the market is below our clinic).

We will gladly see patients at our clinic, but not just for blood work, we try to be their medical home.

Hi Mona, I thought at one point you had offered that testing could be offered out of the Hurley clinic at the Farmer's Market? I may have misunderstood that. That's why we listed it – and can delete that column if that isn't an option.

great format.

the "letter to families" column says "Letter to family encourages provides education and encourages testing through PCP, sent by community partners."

i think the first "encourages" should not be there. it's like that for whole column.

The Hurley clinic is not open to the public. It is the same as any primary care clinic. That column should be removed. Maybe it should be replaced by the "Health Department" since that is another site for testing.

Hi all – we've been bouncing this around, in terms of format, think this captures what we have talked about. Please take a look, share comments/questions on format, content, etc. Thanks!

Nancy
