Thanks Kay. I think there is a lot of material right now. If anything it needs to be winnowed down.

Hello,

As discussed, I've been in contact with Dr. Nick Newman. He originally agreed to come to Flint if we needed him for a community forum/conversation. I sent him a message letting him know that several options for reaching out to the community were discussed at a meeting with key medical and public health leaders and the consensus was away from the "one community gathering" concept in favor of a model to engage trusted community leaders who would ultimately take the message and educational materials into the larger community. I'm forwarding his gracious response to let you know that he remains on board to help in any way that is needed. See his message below and feel free to contact him if needed.

Thanks,
Kay

Kay,

Sounds good. I'd like to help in the way that is most useful for you and your community. Perhaps I could help with training (I've produced educational materials and guidelines on lead poisoning) or I could adapt some materials from the Ohio AAP newsletter for your local use.

Feel free to contact me as the need arises.

Regards,
Nick
