Hi there ,

We are pretty much in tune who the requests should go to in each area (ATSDR, Lead Program, NCEH, etc). Jordan, were you talking to Mary Jean Brown? At any rate, I am on a call right now with our MDHHS folks, and I will relay to them - we have already been talking about long-range response needs and how our federal partners assist.

Eden

Eden, FYI below from Kidee's folks. Evidently, the state needs to make an official request to CDC for resources, visit, etc. I have asked Jordan who should this be directed to specifically. I would be more than willing to help with the specific ask.

Let me know what you think. Mona

I think I have a good idea from the call. In order to get the CDC to send a team of resources in, the state needs to request. If you think it would be helpful to have the CDC send a team to Flint, the medical community in Flint can send a letter to the state asking them to bring the CDC in. What are your thoughts?

 Hey Everyone,

I have a call with the CDC today at 12:30. Sorry for the short notice, we just got it scheduled. Besides the long term help for the effects of lead, is there anything else anyone wants me to bring up?

Thanks,
