Good morning, Mona,

All lead tests (negative or positive) get into the program, no matter the age or source...but always good to check, as this is a cord blood (Hurley Lab?) and this one needs tracked. Mom and family should be tested as well. By virtue of this email I am looping in the State EPid and our CLPP program as well as the Healthy Homes folks, and our GCHD leads. Thank you, Mona!

Linda, can you coordinate the point person to contact Dr. Mona- Hanna-Attisha regarding name, address, etc on this cord blood for investigation ASAP. Should be coordinated per usual case management between GCHD and MDHHS.

Eden, in our cord blood lead research project, we just got a 4.8 result on a newborn's cord blood. Who can I contact to make sure they get a proper home/water investigation? I doubt these labs get into the lead program.
