Nick, thank you for your phone call yesterday. These past couple months have been a blur, and I wanted to go back and see exactly when I first communicated with the state.

My first contact with MDDHS was with Karen Lishinski on Sept 8 (she had come to Hurley a year prior to give a grand rounds on lead). I called her and asked her about the lead concerns and she said that the state had looked at the blood lead data and that there was a possible increase, I asked her for the data over the phone, she said ok, but then I never heard back from her. I sent her the below email the day after.

And then my first communication with Bob Scott was on Sept 16 asking for the data again.

Hi Karen, Hope you are well. Thanks for speaking with me yesterday. Since we spoke, we have been able to run a report on all the blood lead levels in our peds clinic since before and after the water switch. Our research team is still analyzing the data, but it appears that there is an increase. I will share more once the analysis is complete.

Can you please share the MCIR data that you mentioned. That would be most helpful since the sample size is much greater. If there is someone else I should contact regarding the MCIR data request, please let me know.

Thanks! Mona

Hi Dr. Hanna-Attisha,

Dr. Reynolds told me that you were interested in having a speaker at a grand rounds talk. Could you give me a call and let me know when and what you would need in the way of specific information to be presented?

Looking forward to speaking with you!
