Attachments: FINAL Flint Lead TP 092415.docx; ATT00001.htm; BLLs in Flint v2.pptx; ATT00002.htm; Flint Testing and EBLLs_updated 092315_with notes.pdf; ATT00003.htm

Looking at these graphs, I am not seeing what the doc is seeing- I wonder if these graphs were shares with Hurley and Genessee folks?

Attached you will find a copy of our talking points as well as tables that outline our data on blood lead testing in children in Flint before and after the change in Flint's water.

While the chart is a bit cluttered with the different colored lines representing different years, in the bullet point narrative, you can see that our experts state that if the elevated blood lead levels were being driven by the change in water, we would expect the dark blue line to stay high rather than follow the seasonal pattern.

Thank you,
Geralyn
