> Importance: High

>

> Hi Amy and Eden, per Amy's request to edit our Parent Handout on our website.

>

> We made an edit, on page 2, under "What can I do to protect my child

> from lead?" We added to the 3rd bullet, "Consider contacting your

> local water authority to have your water tested." (see attached)

>

> Re-reading your email, were you also wanting us to add something about water to page 1, in the section about "What

> causes lead poisoning?" If yes, we could try to add text something like we have in the info sheet for Pregnant and

> Nursing Mothers and Lead (attached), where it references "Other sources of exposure may include soil and water..."

>

> If that is more of what you are looking for, we can get that done either tonight or first thing in the morning. And/or if

> you have a specific sentence or phrase you'd like us to add, send it along!

> Hi Elizabeth -

- >
- > This document: http://michigan.gov/documents/lead/Parent_Handout_Sept2015_501802_7.pdf is one that we recently approved.
- >
- > We should make sure it reflects that lead poisoning can happen from the water so that people should get the water in their home tested as well.
- >
- > Can you please update this piece and send the rewording to us? Geralyn and Angela both mentioned that Dr. Wells would be a great resources for help with the language.
- >
- > Thank you,
