Subject: TIER 1

Good morning Dr. Edwards and Dr. Sullivan .

Dr. Edwards mentioned schools as TIER 1 plumbing site . Can you break down this classification or steer me to the info ?

Mott Children's Health Center is a 4 floor medical /dental facility for children. We have stopped using Flint water shortly after GM did to save our equipment, then covered our water fountains after the city officially announced the advisory. Our lead results are pending .

Does this TIER classification have any meaning for Mott or any similar type / size facility?
 Also the state has reported school testing for lead in mg / liter when previous reports were in ppb. I have no knowledge to convert these units for an apples to apples comparison.

Subject: Lead educational materials

Hi Hilda:

We want to make sure you have the link to our MDHHS educational materials on lead, available at www.michigan.gov/flintwater. Under resources you'll find posted: a parent handout; lead screening & testing information; and blood lead level guide for providers.

I'll be sure to be in touch as more and updated materials become available, but please reach out if you have any questions.

Thanks and best,

Jennifer (Smith) Eisner
