Subject: NSF certified water pitchers for copper reduction

Mark,

I spoke with NSF. They reviewed their records and the filters being distributed below are not certified for copper reduction. NSF informed me that they should reduce copper (because they reduce lead), but they will not make that statement.

The email below has a link to NSF certified filters for copper removal, which may be beneficial for those with copper sensitivities. I saw that Dr. Carravallah spoke with Mark Edwards regarding copper levels. He may be able to provide more (unofficial) information regarding the filters' capability to remove copper.

- Brita Faucet Filtration System, model number SAFF-100
- PUR Faucet Mount, model number FM-3700B
- Zero Technologies Water Treatment Pour Through Pitcher, model number ZD-018
