Subject: EBLs

I just heard today GCHD planning, maybe-possibly, 1-2 more information fairs that will also do testing...my understanding is rationale similar to the one done yesterday- that many of the Medicaid tests for 1-year olds still needed; while may not catch an affect from water switch, would catch any EBLs so they can get an EBL investigation (which now includes water). I would be interested in your thoughts about how yesterday went- heard good things in news but have been in Detroit all day and have not heard much else.

As I keep saying, these mass blood lead testing events are a bad idea. False sense of reassurance. It should not be the focus.

Is this a joke? ABC reports County is offering free blood lead testing November 5th?

Nearly complete waste of time given a half life of 20 days.

Designed to make the parent feel great?

Marc
