great, we have about 10,000 of our lead nutrition packets that they can take with them for each clinic.

they key is buying lunch for the practices - then you will have an audience.

If it would be of any help, we could have a lead case manager attend as well to put a name and contact information in physicians hands. This morning I asked the case managers to contact the largest pediatric practices and see about meeting with them regarding case management services, sources for filters, nutrition and answer any general questions they might have.

"Gratitude unlocks the fullness of life. It turns what we have into enough, and more. It turns denial into acceptance, chaos to order, confusion to clarity. It can turn a meal into a feast, a house into a home, a stranger into a friend."

into a friend. Gratitude makes sense of our past, brings peace for today, and creates a vision for tomorrow."

Melody Beattie

Good morning ,

I will relay, with your permission of course, this email to our Medical Services Administration, with whom I have had the same discussions. Rest assured that I saw a multi-point plan from this health plan about how to address the issues in their patient population, and these community engagement pieces are just one part.

One issue all are trying to capture is the urgency under which the enhanced testing needs to be conducted, so this is one of a number of strategies the health plans are utilizing.

Another part is of utmost concern, that I know is also in multiple health plans' strategic approaches, is that of provider engagement. Despite the news and the blast faxes and the Health Alerts and the Provider Letters and the Toolkits, we continue to hear from citizens, the Governor's Task Force and EBL case investigators and case managers, that providers are not asking about lead exposure to Flint water since April 2014, nor asking about testing/screening, or whether families have filters. I tried to set up a provider forum in Nov-Dec to little or no interest, but am now working to get one rolling regardless, in partnership with health plans, by end of this month.

It would really be helpful if you could be there to speak about this very issue and give the perspective of a local physician responding to the crisis, and a leader of best practices. We will webinar it and archive it as well (I am wondering if I can make it CME-able as well), and Dr. Reynolds, it would be great to have you involved as well---
