Sorry for the delay – I've literally been on the phone for the last two hours. Could we please add that we need to have a public health campaign or effort so if we could assist local efforts at educating citizens about perceived an actual risks to lead exposure and what to do to reduce those risks. Thanks.

Support local and county efforts to educate providers about Lead monitoring and follow up protocols.

We want to coordinate with health dept and medical society on these efforts- Eden feel free to add.

Fyl- there are many kids who have a capillary ( finger prick) test, but not a venous blood test, which is the next step in protocol.

I will schedule a meeting or call to discuss. Governor would like a point person assigned to each of these items.
