Sharing FYI - the \$850,000 is to be split between CLPPP for case management and Healthy Homes for EBL investigations. Next step for us is decisions about how to put the case management services into place, which Sue Moran has already scheduled a meeting to discuss. I'll be calling in for that meeting - feels good to know we can do more to contribute to something good happening for families in Flint.

Flint Water Funds Head To Snyder

The Senate wasted no time in approving today more than \$9 million to help pay for temporarily returning the city of Flint to the Detroit water system and fund additional staffing in the city's schools to gauge the exposure to lead.

The fix came with unanimous passage of HB 4102, a supplemental appropriations bill the House passed late Wednesday.

The bill allocates \$6 million to get the city back on Detroit's water system; \$300,000 for the Department of Environmental Quality's drinking water and environmental health services; \$1 million for the department's laboratory services; \$1 million for Department of Health and Human Services emergency services to purchase and distribute water to Flint residents; \$850,000

for follow-up services for children, including lead testing and care for those with abnormal levels; and \$200,000 for plumbing inspections.

Senate Minority Leader Jim Ananich (D-Flint) expressed thanks for his colleagues' support in the matter. The move to pump water for the city from the Flint River without proper corrosion controls allowed lead in service lines and welds to leach into the drinking water at levels beyond those requiring remediation.

Gongwer News Service will have more on this story in Thursday's Michigan Report.
