Subject: 11/2 CM update - Flint

- CLPPP Nurse has maintained contact with GCHD nurses regarding child with EBLL, per our Nursing protocol. Per the GCHD Nurse, the child's lead level has continued to decrease, to 20 µg/dl.
- Received calls from Rep. Neely's office regarding an upcoming Health Fair, asking about CLPPP participation or provision of materials (may be on December 15th at a Methodist church?). Suggested that GCHD staff may be their best contact; shared with GCHD that they may receive a call.
