

the bigger issue here is this is data that is routinely available on the MDHHS web site and before the '14 data is posted and/or provided to a reporter, we want to ensure that the program and Epi agree it is correct. I would not want to be in a situation where epi looks at the past data posted and says "we don't think that is accurate".

Hi Jennifer,

Martha has instructed Bob and Jessica that they must inform her should they get any further media calls. Martha will then alert the PIO office and other PHCSA leadership so that we can ensure consistency in the lead data and information HHS is making public. Should the inquiry come to you first, please work through Martha and we'll make sure you get what you need. Thanks

Linda

Subject: FW: 2014 lead data

All –

A reporter with Bridge Magazine is requesting the statewide 2014 (and if possible, 2015) CLPPP data. Bob sent me the attached county-level info for 2014 which I have not shared yet, as it's not the final report.

We would like to touch base to make sure the data has been finalized and reviewed by epi before it's posted online.

Eden – we'll reach out to you in the morning to discuss the media request. Beyond the data, the reporter is also interested in discussing home lead investigations.
