Wes is away from his desk but I asked staff. We do not have the final reports from the 5 completed EBLs from ETC as yet. It takes several days to get analytical results from the lab on the dust, soil and water samples. But field staff are definitely finding lead paint and other lead-containing hazards at the homes. Will have to wait and see on the water samples, but I'll get back to you when we have more results.

We do have a completed report for the Flint home where the dogs were lead poisoned: water samples were 4 ppb unfiltered kitchen tap, 8 ppb main bathroom, 100-300 ppb in outside faucet, and over 7000 ppb in an indoor basement tap. There was also lead paint and dust hazards.

Can you ask Wes if they have determined the lead source in the EBL investigations that have been completed?
