If not: is there any possibility to get aggregate data? What level of aggregation would there be? I am trying to wrap up part of my research asap, and it would be useful to have health outcomes from Michigan.

Finally, does Michigan have a database of lead inspections and certifications? Would it be possible to access it? Feel free to refer me to someone else who would be in charge of this.

Thank you very much

Best

The hearing went well, I guess. Aside from staff, only one person showed up, and he spoke in favor of the changes. No written comments were received. In other words, there was no opposition. The process still needs to grind through the remaining steps, which may still take several weeks, I'm told.

Subject: Re: Children BLL data with addresses

Dear Bob,

I'm just writing to check about the public hearing regarding the diffusion of children's BLL data for research purposes. How did it go?

Thank you!

Ludovica,

The public hearing for those rule changes is scheduled for January 30. So things are progressing, but I don't know how long it will take after the hearing. Please feel free to check back periodically to see where things stand.

Bob
