Alanna,

Please see three attached files. I've been working on some of the pieces and parts for 2014. Communities and ZIPs to follow later today.

We are trying to put together a snazzy, user-friendly Annual Data Report, but it may be a while yet.

Please note that despite my assurance that the spreadsheet I sent before GHHI was "final," the attached spreadsheet for kids age 0-5 is in fact slightly different. We discussed "confirmed" the other day, and decided we should stick to our long-standing policy that only a venous test can "confirm" an elevated blood lead level. In the version I sent you earlier, I was including (for the first time) two elevated capillary tests as "confirmed," which boosted the numbers just slightly.

Bob

Hi Bob,

I hope that you had a wonderful weekend. Any word on when the final report for 2014 EBLs will be out?

Thanks!

Best,

Alanna

Hi again Bob,

Do you have the numbers for children under six with 5-9 EBLs from 1998-2003? If so, could you please send them to me?

Thank you!

Best,

Alanna

Alanna,

Sorry, didn't hear your phone message until this morning. Please see attached.

Bob
