Spoke with Dan. He concurred. Rich should give him a call. Rich, I will call you now to give you some additional call info.

Thanks
Rick

For 10:30am call.
Slightly revised statement based on review from Legal:

DRAFT STATEMENT:

When I became aware that the city of Flint's water showed elevated lead levels and that the state's handling of the situation was being questioned, I appointed an independent task force to investigate how the situation evolved and identify possible missteps and areas for improvement.

The task force has done an exceptional job, reviewing stacks of documents and interviewing scores of Flint, Genesee County, state and federal officials.

Although the task force's final report is not yet completed, it has made me aware of some interim findings and corrective steps that I have decided to take immediately in order to restore trust in how the state keeps its citizens safe and informed.

Moving forward we will listen intently and be more responsive to community needs.

I have determined that it's appropriate to accept the resignation of MDEQ Director Dan Wyant, and have made other personnel changes to address problems cited by the task force.

Changes in leadership and staff are not enough. I understand there can be disagreements within the scientific community. That is why I have directed both the departments of Environmental Quality and Health and Human Services to invite every external scientist who has worked on this issue to be our partners in helping us improve Flint water. Let's share research on water and blood lead level testing to arrive at accurate and mutually supported conclusions. Together, we should work to affirm that we're using the very best testing protocols to ensure Flint residents have safe drinking water and that we're doing proper monitoring and remediation of health impacts over the short and long term.

I want the Flint community to know how very sorry I am that this has happened. And I want all Michigan citizens to know that we will learn from this experience, because Flint is not the only city that has an aging infrastructure.

But I know many Flint citizens are angry and want more than an apology. That's why I'm taking the actions today to ensure a culture of openness and trust. We've already allocated \$10 million to test the water, distribute water filters, and help in other ways. Last week, I called Flint Mayor Karen Weaver, and we're going to meet soon to discuss other ways the state can offer assistance.

These are only initial steps - we fully expect to take more actions following the recommendations of our task force. When it comes to matters of health and quality of life, we're committed to doing everything we can to protect the well-being of our citizens.

10:30 am tomorrow works.

Draft statement below. Language regarding Dan is included, pending our discussion tomorrow.

DRAFT STATEMENT

"When I became aware that the city of Flint's water showed elevated lead levels and that many the state's handling of the situation was being questioned, I appointed an independent task force to investigate how the situation evolved and identify missteps and areas for improvement.

"The task force has done an exceptional job and has been relentless in focusing on the facts. It so far has reviewed stacks of documents and interviewed scores of Flint, Genesee County, state and federal officials, and keeping me and my team apprised of its progress.

"Although the task force's final report is not yet completed, it has made me aware of some interim findings and corrective steps that I have decided to take immediately to restore trust in how the state keeps its citizens safe and informed.

"No matter what the testing requirements were, they were not enough to prevent this situation. Moving forward we will listen intently and be more responsive to community needs.

"I am accepting the resignation of MDEQ Director Dan Wyant, and have made other personnel changes to address problems cited by the task force.

"Changes in leadership and staff are not enough. I understand there can be disagreements within the scientific community. That is why I have directed both the departments of Environmental Quality and Health and Human Services to invite every external scientist who has worked on the Flint water issue to be our partners in helping us improve Flint water. Let's share research on water and blood lead level testing to arrive at accurate and mutually supported conclusions. Together, we should work to affirm that we're using the very best testing protocols to ensure Flint residents have safe drinking water and that we're doing proper monitoring and remediation of health impacts over the short and long term.

"I want the Flint community to know how very sorry I am that this has happened. And I want all Michigan citizens to know that we will learn from this experience, because Flint is not the only city that has an aging infrastructure containing lead lines.
