

The state police have been closely engaged in the situation since the beginning, meeting with both county and city leaders to guide them through state and federal laws regarding the emergency management process. Due to the uniqueness of this situation, we have to look at all possible options to help Flint residents.

But prior to a formal declaration, we are recognizing this as an emergency and are working with city and county leaders to coordinate efforts, streamline communication and tap all available resources at the state's control.

I'm attaching an MSP fact sheet about the process that I'm sure you will find helpful.

Subject: Flint's emergency declaration

Hi, Dave, and Happy New Year.

I see that Flint's declaration of emergency is on its way to Governor Snyder. Has he decided yet whether he will sign, amend or reject it?

Thank you for the help.
