Thanks Dave.

I'd be glad to include any specific instances of the inaccuracies if you point them out.

Hi Ron. I trust that you are pointing out the many inaccuracies and extreme hyperbole in that video. I can give you a statement:

"Gov. Snyder believes all Michigan residents need and deserve safe, clean water, and the state government has worked closely with Flint leaders to help them with their water infrastructure challenges, which were decades in the making. That assistance includes \$2 million in grants to help with pipeline leaks and other issues, which allow the city to prioritize its repairs, replacing pipes. That's part of a long-term solution to the city's needs."

Dave:

I'm planning to post a link to the video that I've attached from the ACLU of Michigan.

Much of the video is about Flint River water but there's a lot of it that deals with the role that emergency managers played in switching the city's water source.

I've attached a link and wanted to see if your office wants to comment.

Thanks,
