Subject: Re: Flint water

Just so you know ... that's not accurate history, Nancy. This change was pushed and direct request of Genesee Co Board of Commissioners AND city council (7-1) and mayor at the time. We had severe reservations about switch but ultimately was nearly unanimous request from local local level that Treasury signed off on. (And FYI double checking, but nearly certain EM at time was not Darnell E.)

Not that any of that matters, Nancy.
The bottom line is that we have been working hard to do everything possible to play a supportive role and work in collaborative fashion across all levels of government with community, faith & business leaders, residents, etc.

Protecting public health is paramount and safe, clean, accessible drinking water is essential. That's what we solely focused on helping ensure.

Highly recommend you reach out to state Health & Human Services team for how this data set was spliced and diced. That's key to understanding. They can walk through for you and Freep team.

Thanks much,
SW

Hey Sara - comment on this elevated lead in the Flint water system? Specifically because the Flint EM is the one who made the decision to hook up to the Flint ... the same Flint EM who is now DPS EM, correct?
