Subject: Follow up

I just sent a briefing on the Auditor General letter (it wasn't an audit, which I may have inadvertently called it).

I will be on the 11 a.m. call. Can one of you share with me the number and access code?

As for "ideas on how to get more resources," can you help me out with this Rich? These resources would be:

- At least \$5 million more contributed by the state for blood lead level testing, remediation and follow-up
- Efforts to get accurate information on the breadth of the issue by bringing together state and independent researchers and making DEQ and DHHS records available to researchers
- Exploration of more resources, including possibility of an imminent danger declaration
- A communications team dedicated to the water crisis
- What am I missing?

I will send that Dec. 29 statement to the appropriate parties.

- Meegan
