Subject: RE: STATEMENT

We're going to continue to work openly, transparently and collaboratively with all partners at the local, state and federal levels to ensure safe, clean, accessible drinking water for Flint residents. Our state team will continue to stay focused on that task and doing everything possible and bringing all technical expertise and possible resources to bear.

Subject: STATEMENT

"well anyone who has followed this story from the start realizes that the state has zero credibility, they created this problem, they have taken steps to cover it up and im not hearing any signs that they are admitting their mistakes and giving people straight answers"
